The Programs in Environmental Science and Environmental Studies

The Environmental Science Minor

The Environmental Science minor requires a total of 6 courses apportioned in 3 components: a core component, a technical component, and a policy/issues component as well as the foundational course EVST 100. No more than three courses required (a) for the student's major or (b) to satisfy Common Course of Study requirements may be counted towards the minor. Students pursuing the minor are required to take 3 courses outside of their major and encouraged to pursue an environmentally oriented Independent Study or Honors Thesis. Please note that some courses have prerequisites; it is the student's responsibility to fulfill any prerequisites. Students pursuing the minor must have the program of study approved by the program director. Any course selection differing from those prescribed below requires a petition to the Environmental Science and Studies Advisory Committee and approval of the Academic Progress Committee.

F – offered in the Fall semester

S – offered in the Spring semester

B – offered in both semesters

This notation is not a guarantee that the course is offered in the indicated semester. It is only a notation of when the course is typically offered. Please consult the Course Schedule listing on the [Office of the Registrar's Website](#).
